ABOUT ME

Frontend-focused Software Engineering undergraduate with strong experience in software development, specializing in React. Experienced in building scalable full-stack applications using the MERN stack, designing responsive user interfaces, integrating REST APIs, implementing secure backend systems, and writing tech articles. Passionate about delivering performance optimized, real-world solutions and contributing to high-impact engineering teams.

- Languages & Markup: JavaScript, TypeScript, HTML, CSS, Java
- Frameworks & Tools: React, Next.js, Node.js, Express.js
- Libraries & UI: Tailwind CSS, Bootstrap
- Databases: MongoDB, MySQL
- Design & Dev Tools: Figma, Canva, Visual Studio Code
- Version Control: Git, GitHub
- Concepts : OOP, Data Structures & Algorithms, Design Patterns, Software Architecture & System Design, Basic Cloud Concepts, SDLC, REST APIs, Responsive Design, Full-Stack Development
- Other Skills: Problem Solving, Teamwork, Communication, Time Management, Adaptability

PROJECTS

• Planora - Event Planning Platform

Dec 2025 - Jan 2026

Developed the frontend of a full-featured event planning platform. Users can browse and filter a dynamic vendor marketplace with portfolios, pricing, availability, and ratings, fill event details, manage a real-time cart and budget tracker, and interact with a vendor portal interface.

- TypeScript, React, Tailwind CSS

• HappyTails – Smart Pet Adoption & Rehoming Platform

Nov 2025 - Ongoing

Participated as Frontend Developer in a full-stack group project to create a modern platform connecting adopters, shelters, and pet owners. The project aimed to streamline pet adoption and rehoming, offering features like smart filters, role-based access, real-time updates, and a responsive interface.

- React, Tailwind CSS, Typescript

• AriyaHome Construction Pvt Ltd

Sep 2025 - Dec 2025

Developed a full-stack web application to streamline client inquiries and service management for construction businesses. Built a responsive, user-friendly frontend and integrated it with a secure backend to handle inquiries, data validation, and real-time communication.

- React, Tailwind CSS, Axios, Node.js, Express, MongoDB

• Linkora – Social Networking Platform for University Students

May 2025 - Aug 2025

Linkora is a full-stack social networking platform designed to connect university students, helping them showcase skills, achievements, and collaborate on projects. Developed as a group project, with my role as Frontend Developer, responsible for building responsive and interactive user interfaces.

- Next.js, Tailwind CSS, Express.js
